

## Accurate, Timely, and Efficient Inventory Management – On the Spot

Save time and simplify your inventory management with ServiceTitan Inventory App, which enhances the ServiceTitan Inventory Module by streamlining inventory workflows with mobile barcode scanning.

### Increase accuracy

Manage costs by knowing what you need and picking the right part

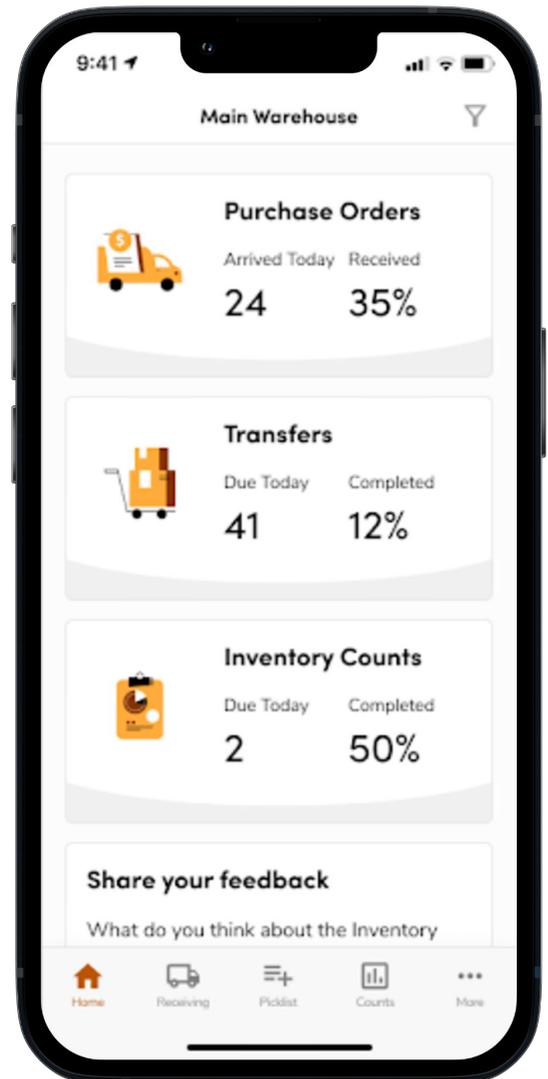

### Save time & sanity

Streamline PO receiving, transfers, and cycle counts, eliminating piles of paperwork

### Increase margin & profitability

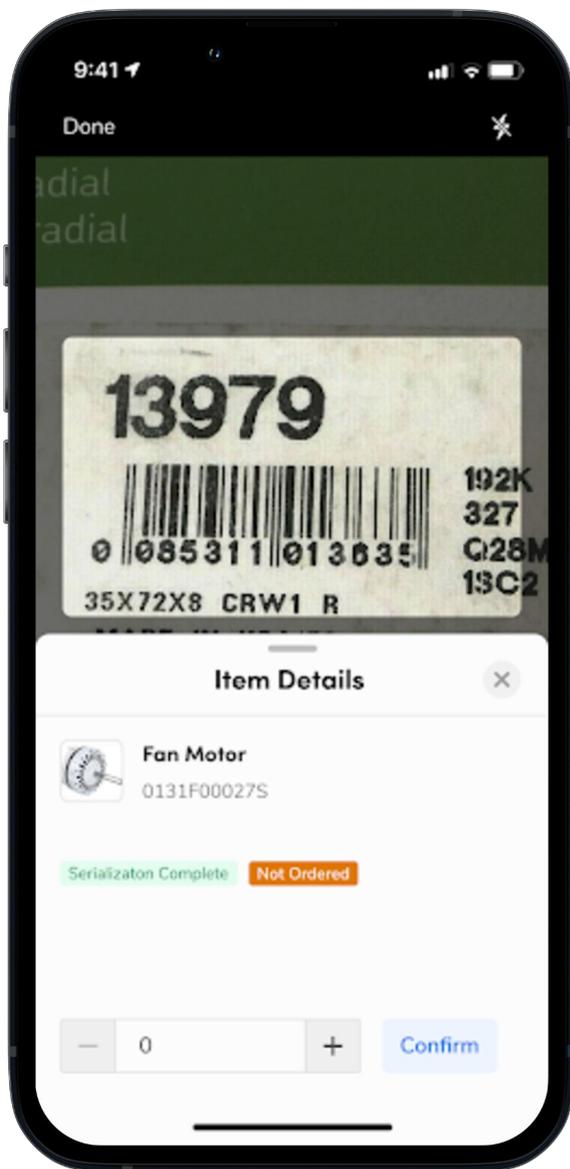

Improve accuracy and efficiency, leading to profitability

## ServiceTitan digitizes and streamlines the manual inventory processes

Reduce the effort required to maintain accurate and timely inventory information with ServiceTitan Inventory App, which eliminates the need to record inventory transactions with pen and paper and manually enter the data later.

### Barcode scanning

Save time and increase accuracy by scanning items, reducing errors in transaction data.

### Receiving

Streamline the receiving process by receiving stock into inventory as close to real-time as possible.

### Transfers and picklists

Dedicate less time and resources to pulling material for replenishment and requisitions.

### Cycle counts

Perform accurate counts to help maintain accurate financials.
